PROFESSIONAL SUMMARY

Frontend Lead with 11 years of experience architecting scalable, high-performance web applications using Angular, Typescript and NodeJS. Skilled in developing RESTful APIs, CI/CD practices and leading teams in agile environments to deliver user-centric WCAG-compliant interfaces with clean code practices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SCSS
Frameworks: Angular(v20), React, NodeJS, NestJS
State Management: NgRx, Signals
Testing: Unit Testing, Jasmine, Jest, Cypress.
Backend: NestJS, NodeJS,
Clouds: AWS, GCP
Tools: Docker, Kubernetes, Git, Azure DevOps.
Others: RESTful APIs, CI/CD, Performance Optimization, Responsive Design

WORK EXPERIENCE

Expert Software Engineer, Finastra
Feb 2024 – Current
- Leads teams of 5 frontend engineers to deliver features on time in agile environment.
- Leading frontend architecture for scalable, maintainable applications using Angular.
- Managing a team of 5 frontend developers through code reviews, mentoring, and technical guidance.
- Collaborating with backend, design, and product teams to deliver high-quality, user-centric interfaces.
- Managing technical debt and guiding migration to newer frameworks and versions.
- Implementing advanced state management using NgRx and Signals.
- Planning and breaking down features into deliverable tasks, ensuring alignment with Agile sprint goals.
- Resolving customer issues, implementing new features, and fixing bugs to enhance product stability and user experience.
- Ensured WCAG-compliance and performance optimization, improving page load speed by 30%

Senior Software Engineer, Epam Systems
Jan 2022 - Nov 2023
- Implemented Direct debit payment method and dynamic currency conversion feature in Mastercard payment gateway.
- Migrated Mastercard simplify platform from legacy (AngularJS) to Angular, reduced load time by 40%.
- Conducted code reviews, technical interviews and daily stand-up calls
- Handled bug fixes, angular upgrades and WCAG-compliant accessibility.
- Reduced customer-reported UI issues by 25% by optimizing frontend validations.

Senior Software Engineer, Capita
Jun 2020 - Dec 2021
- Implemented web design and development principles to build stable software.
- Created custom angular component for usability.
- Developed mock-ups into functional interfaces using Angular, HTML, and CSS.
- Written automated script using Cypress.
- Monitored website performance to rectifying frontend-related issues.
- Documented bug reports, tickets and any code changes.

Consultant/Mobile Developer, Bristlecone/Aditya Birla Capital/ Syntel Inc
Jun 2014 – Apr 2020
- Developed and deployed enterprise hybrid mobile applications used by 50000 users.
- Developed web application using angular framework.

EDUCATION

Bachelor Of Engineering, Computer Engineering, Mumbai University (1st Class)
Jun 2009 - Jun 2013

CERTIFICATIONS

- Associate Cloud Engineer (GCP), Issued 2023
- AWS Certified Solutions Architect- Associate, Issued 2023

AWARDS AND RECOGNITION

- Syntel Hackathon -Winner 2016
